Jet Source adds Challenger jet for more transcontinental charters

The full-service Carlsbad aviation center operates a diverse fleet of charter aircraft

CARLSBAD, Calif.; April 27, 2009 ... [Jet Source](#), Southern California's leading business aviation center, has expanded its fleet of chartered aircraft for the second time in a month with the addition of the spacious Challenger 604, the only wide-body aircraft in Jet Source's charter fleet. The Challenger provides business travelers with an efficient meeting and presentation space and leisure travelers with room to relax and unwind.

"Our charter customers avoid the long waits and complex itineraries associated with commercial air travel," said Megan Cunningham, Jet Source's vice president of charter services, "and they also benefit from the additional security and privacy that comes from our gated premises and private car service out to the ramp."

This Challenger seats 10 and provides up to eight hours of travel time to reach destinations of up to 3,200 miles making it suitable for non-stop coast to coast travel and inter-continental trips.

Jet Source charters include a dedicated flight crew, including cabin attendant, and is the only San Diego charter company to achieve the industry's highest rating for safety, an ARG/US Platinum rating.

The Challenger includes an entertainment system, individual DVD players, stereo system, flight phone, and Air Show, which gives real-time flight status with visual graphics, maps and safety data. It has a full galley complete with crystal glassware, as well as an oven and microwave for in-flight gourmet dining provided by Jet Source's concierge service. And it can accommodate nine suitcases, eight golf bags and eight pairs of skis.

Other aircraft on Jet Source's 135 charter certificate include a Legacy 600, Gulfstream 400, Falcon 50, Hawker 800A, Citation VII, Westwind II, Citation CJ3, and Citation I.

More can be found online at www.jetsource.com.

About Jet Source:

Jet Source is San Diego's leading business aviation center and is the only facility in Southern California to combine a fully-equipped Fixed Base Operation (FBO) with full charter, aircraft management, maintenance, avionics and dedicated fuel station services. It's also uniquely solar-powered, and the only San Diego charter company to earn an ARG/US Platinum rating, the industry's highest standard of safety.

Located at McClellan-Palomar Airport in Carlsbad, California, where it offers unparalleled privacy through its secure, gated access and private car service to the ramp, Jet Source is the gateway in and out of San Diego for many of its most influential visitors and residents.
